

SOUTH GLOUCESTERSHIRE MINES RESEARCH GROUP: CGP2

ACTIVITIES

The SGMRG will work within the National Association of Mining History Organisations Guidelines, and will expect all members to comply when acting for or within the Group.

When carrying out works or visits above or below ground we will:

- identify good practice – using the NAMHO and other guidelines
- assess the extent and nature of any relevant risks
- identify appropriate measures to manage those risks
- be clear to all involved the nature of any risk and their informed acceptance of risk.
